

# AeroBarrier X1 Sealant Key Benefits

## Aerobarrier Uses Less Sealant than Other Air Sealing Methods

- Sealant only deposits at specific locations of leaks – only 4 gallons of AeroBarrier sealant is used to seal an average size home
- Spray foam insulation, wraps, membranes, and fluid applied sealants need to cover an entire surface area
- Caulks and sill plate gaskets need to cover continuous joints and connections

## Air Sealing at Top Plate

AeroBarrier X1 Sealant only deposits where air leaks exist - and doesn't deposit where there are no leaks

## A Safer & Healthier Sealant

- GreenGuard Gold certified
- Safe for use in any type of building
- Water based acrylic
- No off gassing
- Very low VOC
  - AeroBarrier = 12 g/l
  - Low VOC paint = anything less than 50 g/l
